**EasyEnroll in the plan**

Do you only have a minute to enroll in the plan? Easy Enroll provides the convenience of “one-click” enrollment from your computer, smartphone or tablet with preset contribution and investment options. If you are already enrolled in the plan, you will not be able to use the EasyEnroll option.

2. Verify your identity.
   - Enter the last 4 digits of your Social Security number.
   - First Name
   - Last Name
   - Date of birth
3. Select the Starter Package you would like and click “Enroll Now”.
4. Review the confirmation page and take note of your next steps.

If you have more time to enroll and take additional actions, follow the next steps.

**Establish a username and password**

If you are logging on for the first time, you will need to establish a username and password. If you already have a Fidelity.com, NetBenefits or eWorkplace account, you may log in using that information.

2. Click Register.
3. Verify your identity.
   - Enter the last 4 digits of your Social Security number.
   - First Name
   - Last Name
   - Date of birth
4. Create a Username.
   - Your username can be your Social Security number, but to better protect your account, we strongly recommend that you create a unique username. Once you create a username, you cannot revert to your Social Security number.
   - Your password should not be personally identifiable information, such as your Social Security number, telephone number, or date of birth.
Username Standards
- Use 6 to 15 letters and/or numbers.
- If your username is between 9 and 11 characters in length, it must contain at least two letters.
- Do not use one entire piece of personally identifiable information such as your Social Security number, telephone number, or date of birth. Instead, alter or disguise it (e.g., Jane212Smith).
- Do not use 5 or more instances of a single number or letter, or easily recognized sequences (e.g., 11111 or 12345).
- Do not use symbols, punctuation marks, or spaces (e.g., #, @, /, *, -).

5. Create a Password
Your password protects your account from unauthorized users.

Password Standards
- Please use 6 to 20 letters, numbers, and/or special characters. Letters are case sensitive.
- You may not use: # & * < > [ ] ‘ { }.
- You may not use sequences (e.g., 12345 or 11111).
- Personal info (Social Security number, phone #, DOB).

A strong password is one that is between 15 and 20 characters, has a mix of case sensitivity, numbers, letters, and special characters.

6. Create a Security Question
If you ever forget your password, you can reset it after Fidelity verifies your identity using your new or updated security question and answer.

Security Answer Standards
- Answers must be between 3 and 31 characters, no spaces.
- Select a question that you can easily answer.
- Answers are not case sensitive.

7. New User Registration Confirmation
If you have other accounts you access via Fidelity.com, NetBenefits, or eWorkplace®, your new log in information applies to these accounts, as well as to accessing your account by phone.

**Note:** Email Confirmation - Notice of Recent Change or Inquiry
You may receive an email notice of a recent change or inquiry into your account username or password. This message is automatically generated when you set up or make changes to their login information.

**Update your mail preferences**
Receiving communications by email offers you greater convenience and will help keep you up-to-date on topics related to your retirement plan.
